- Languages & Frameworks: HTML, CSS, JavaScript, Python, Node.js, React
- Tools & Technologies: Git, GitHub, Jest, Netlify, REST APIs, MySQL, PostgreSQL
- Other Tools: Zoom, Office Suite, Slack
- Systems: MacOS, Windows
- Concepts: Debugging, Troubleshooting, Web Design, Data Analysis

#### **Core Competencies:**

- Adaptability & Fast Learning
- Attention to Detail
- Collaborative Problem Solving
- Communication & Teamwork
- Strong Work Ethic & Reliability

## **Work Experience**

### **Ulta Beauty**

*Task Associate*

April 2025 – Present

- Utilized inventory management systems and handheld devices to track product movement, support restocking, and maintain data accuracy.
- Maintained store compliance with visual merchandising software and digital planograms to align with national marketing rollouts.
- Supported cross-functional coordination with stockroom and online order fulfillment teams, ensuring fast resolution of discrepancies.

### **Amazon, INC**

*FC Associate*

May 2021 – April 2025

- Operated RF scanners and Amazon's internal software to accurately pick, stow, and process high volumes of inventory.
- Followed standardized procedures in a fast-paced warehouse environment, ensuring consistent safety and quality standards.
- Collaborated with team members and supervisors to meet performance metrics and improve workflow efficiency.

### **Dunkin'**

*Manager*

August 2018 – May 2021

- Trained team members on POS software, inventory tracking tools, and scheduling platforms, ensuring operational consistency.
- Analyzed sales reports and labor management data to make real-time decisions that improved profitability.
- Oversaw daily technical operations, including register troubleshooting, device setup, and reporting system backups.
